Award Winning Artist Joss Stone Goes Undercover in Activision’s James Bond 007™: Blood Stone

James Bond 007: Blood Stone Delivers Intrigue and Explosive Third-Person Action for the Xbox 360, PlayStation(R)3 system, Windows PC and Nintendo DS(TM) This Holiday Season

SANTA MONICA, Calif., July 16, 2010 /PRNewswire via COMTEX News Network/ -- Award winning artist Joss Stone is set to debut as the newest Bond girl in Activision Publishing, Inc.’s (Nasdaq: ATVI) James Bond 007: Blood Stone, an original Bond experience from legendary screenwriter Bruce Feirstein. In addition to stepping into a leading role, Grammy and BRIT Award winner Joss Stone will create original music for the game, luring players into an explosive third-person action adventure where they will unravel an international conspiracy across exotic locales. Players will experience full-throttle, behind-the-wheel action on land and sea while using the most high tech gadgetry known to James Bond 007, the world's most skilled secret agent.

"James Bond 007: Blood Stone captures the cinematic intensity of a Bond film by immersing players in an intriguing conspiracy that will require them to think and act like James Bond," said David Pokress, Head of Marketing for Licensed Properties, Activision Publishing. "In addition, the game will feature a diverse array of multi-player modes and debut strategic objective-based gameplay that will allow Xbox 360, PS3(TM) and PC players to battle as teams of spies and mercenaries through authentic Bond locales."

James Bond 007: Blood Stone features the likeness and voice talent of Daniel Craig, Joss Stone and Judi Dench and features an epic, original story developed by legendary screenwriter Bruce Feirstein. Players can engage in cover-based firefights, lethal hand-to-hand combat and speed their way through explosive adrenaline-fueled driving sequences as they embark on a global chase leading to action on land and sea through Athens, Istanbul, Monaco and Bangkok. Gamers can also feel what it is like to be a 00 agent, as they take the battle online in several robust 16-person multi-player modes that require skill, teamwork and strategy as players compete in matches that will have spies battling mercenaries.

Joss Stone provides an original musical track to the game titled, "I'll Take it All" written and performed by her and Dave Stewart of the Eurythmics. The song will be featured exclusively in James Bond 007: Blood Stone.

The James Bond 007: Blood Stone video game is being developed by critically acclaimed developer Bizarre Creations for the Xbox 360(R) video game and entertainment system from Microsoft, PlayStation(R)3 computer entertainment system, and Windows PC under license from EON Productions Ltd and Metro-Goldwyn-Mayer Studios Inc. (MGM). Additionally, an original Nintendo DS(TM) game is being developed from the ground up by n-Space. For more information about the game, visit www.007.com.

**Cautionary Note Regarding Forward-looking Statements:** Information in this press release that involves Activision Publishing’s expectations, plans, intentions or strategies regarding the future are forward-looking statements that are not facts and involve a number of risks and uncertainties. Activision Publishing generally uses words such as “outlook,” “will,” “could,” “would,” “might,” “remains,” “to be,” “plans,” “believes,” “may,” “expects,” “intends,” “anticipates,” “estimate,” “future,” “plan,” “positioned,” “potential,” “project,” “remain,” “scheduled,” “set to,” “subject to,” “upcoming” and similar expressions to identify forward-looking statements. Factors that could cause Activision Publishing’s actual future results to differ materially from those expressed in the forward-looking statements set forth in this release include, but are not limited to, sales levels of Activision Publishing’s titles, shifts in consumer spending trends, the impact of the current macroeconomic environment, the seasonal and cyclical nature of the interactive game market, Activision Publishing’s ability to predict consumer preferences among competing hardware platforms, declines in software pricing, product returns and price protection, product delays, retail acceptance of Activision Publishing's products, adoption rate and availability of new hardware (including peripherals) and related software, industry competition including from used games and other forms of entertainment, litigation risks and associated costs, rapid changes in technology, industry standards, business models including online and used games, and consumer preferences, including interest in specific genres such as music, first-person action and massively multiplayer online games, protection of proprietary rights, maintenance of relationships with key personnel, customers, licensees, licensors, vendors, and third-party developers, including the ability to attract, retain and develop key personnel and developers that can create high quality “hit” titles, counterparty risks relating to customers, licensees, licensors and manufacturers, domestic and international economic, financial and political conditions and policies, foreign exchange rates and tax rates, and the identification of suitable future acquisition opportunities and potential challenges associated with geographic expansion, and the other factors identified in the risk factors sections of Activision Blizzard’s most recent annual report on Form 10-K and any subsequent quarterly reports on Form 10-Q. The forward-looking statements in this release are based upon information available to Activision Publishing and Activision Blizzard as of the date of this release, and neither Activision Publishing nor Activision Blizzard assumes any obligation to update any such forward-looking statements. Forward-looking statements believed to be true when made may ultimately prove to be incorrect. These statements are not guarantees of the future performance of Activision Publishing or Activision Blizzard and are subject to risks, uncertainties and other factors, some of which are beyond its control and may cause actual results to differ materially from current expectations.
